Osmose Utilities Services Has Begun Pole Testing

Osmose Utilities Services is currently performing utility pole tests in the St. Charles South & Sherman South township in Cuming County and Pebble, northern Cuming, & northern Ridgely township in Dodge County all within the Cuming County Public Power District. This pole testing began last week and will take a few more weeks. You will see their pick-ups and ATV's along the country roads. Please be aware of these workers and drive carefully.

Most utility poles are made of wood and their constant exposure to the environment takes a toll. Wind, moisture and soil conditions all can distress or decay wood. Regular pole inspection and treatment helps to spot and take care of any problems before they become critical situations.

Osmose Utilities Services is a professional firm that is an expert in pole evaluations. Employees from Osmose will be identifiable by company logos, equipment, shirts and hard hats and will carry identification.

For more information, stop at the CCPPD office 500 South Main Street West Point or call (402) 372-2463.
