Sign up for Green Energy Today

Cuming County Public Power District is now offering the Green Energy Program to our customers. The "Going Green" program is where customers can purchase renewable energy or "green power" which is energy generated from Nebraska-based renewable sources.

Customers can buy an energy block from CCPPD and help the environment. Currently, a Green Energy Block (100 kWh) is available at \$1.80 plus regular rate (plus sales tax and bill adjustments as applicable) per block. When you purchase a "Green Energy Block", all of the revenue from the block is passed on to the Nebraska Public Power District to help subsidize the higher cost of renewable energy and to help sustain green energy in Nebraska.

Contact Cuming County Public Power District for more information toll free at 1-877-572-2463 or stop in the office from 7:30a-4:00p Monday-Friday.
